

RYTHM
COMPANY OS

Governed intelligence in motion.

A modular identity for human authority, AI coordination, and traceable execution.

Identity before decoration

RYTHM is an AI-native Company Operating System, not a chatbot. The identity therefore signals accountable authority, modular organization, governed coordination, and operational movement.

MISSION

Build governed AI-native companies that improve human capability while keeping consequential authority under accountable human control.

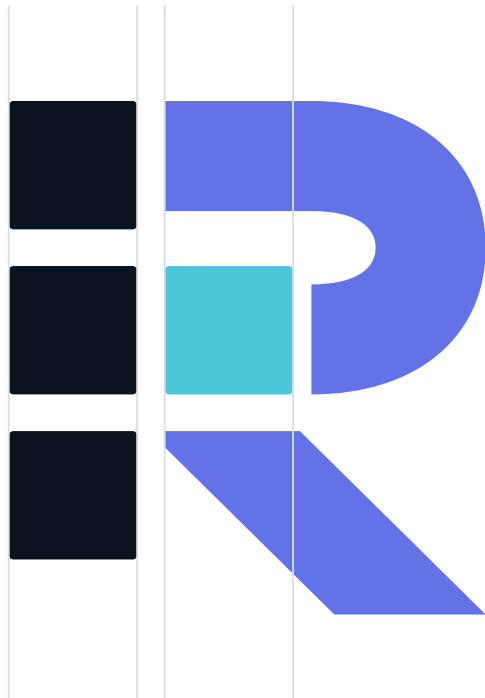

VISION

Become the trusted operating layer through which organizations coordinate humans, AI agents, decisions, knowledge, and execution.

DESIGN PRINCIPLES

- **Precise, never ornamental**
- **Technological, not cyberpunk**
- **Alive, not visually noisy**
- **Premium and enterprise credible**
- **Accessible at every size**

An operating system in one mark

01 Authority axis

The left modules hold the organization to a stable chain of accountable authority.

02 AI organization

Repeated modules represent agents, departments, memory, projects, and governed operating units.

03 Decision point

The cyan node is the visible moment where context, control, and approval meet.

04 Execution vector

The diagonal leg turns deliberation into accountable action and traceable outcomes.

Built for every interface

PRIMARY HORIZONTAL LOCKUP

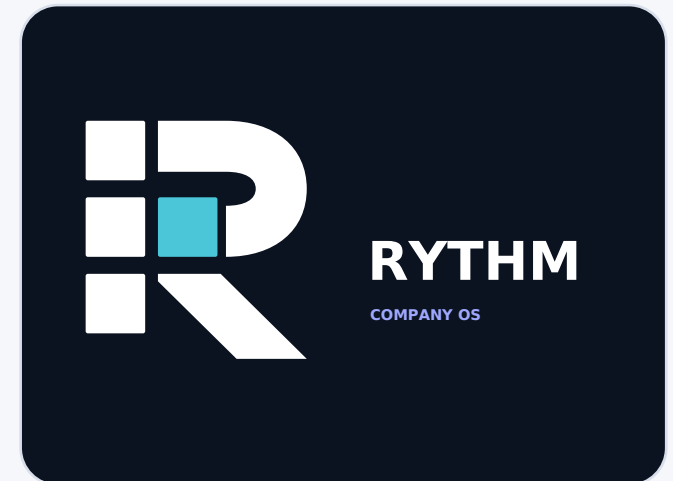

Use for landing pages, documents, product headers, and partner materials.

SYMBOL

STACKED / AVATAR

Authority first. Signal with restraint.

Navy carries authority and trust. Indigo expresses governed coordination. Cyan is reserved for active decision points, focus, and controlled system signals.

Authority Navy

#0B1220

Primary type, surfaces, control

Governance Indigo

#6472E8

Hierarchy, navigation, focus

Decision Cyan

#4BC6D8

Active signal, decision node

System Cloud

#F5F7FB

Primary light environment

Operational Slate

#667085

Secondary copy and metadata

Supporting system colors

Success

#2FB878

Attention

#E2A13D

Border

#D9DFEA

Accessibility rule

Do not use cyan for body text on white. Preserve high-contrast navy/white combinations for essential information and controls.

Clear enough for command. Human enough for trust.

PRIMARY UI AND MARKETING

Inter

Use Inter across the public site, authenticated product, decks, and operational documents. Strong weights support command hierarchy; regular weights preserve calm readability.

TECHNICAL LAYER

Geist Mono

Use sparingly for IDs, versions, logs, system status, timestamps, and traceability details.

Wordmark note

The supplied RYTHM wordmark is converted to vector outlines. Never recreate it by typing the name in a font. Use the approved artwork files.

TYPE SCALE / DIGITAL

DISPLAY	64 / 0.96
H1	48 / 1.00
H2	32 / 1.10
BODY	16 / 1.60
LABEL	12 / 1.20

Give the system room to operate

Keep at least one x of clear space around every lockup. No text, frame, or competing graphic may enter this area.

Minimum digital sizes

Symbol	20 px
Navbar lockup	120 px wide
Primary horizontal	180 px wide
Print horizontal	25 mm wide

Recognizable from 16 px to the app store

APP ICON / 512

PWA ICON / 192

TOUCH ICON / 180

FAVICON / 32

FAVICON / 16

At small sizes, use the symbol only. Do not place the full wordmark in browser tabs, app launchers, social avatars, or square navigation controls.

- The cyan decision node must remain visible whenever color reproduction is reliable.

Protect the signal

Do not stretch

Preserve the original aspect ratio.

Do not recolor

Use only approved palette variants.

Do not add effects

No glow, bevel, shadow, or 3D treatment.

Do not rotate

The authority axis remains vertical.

Do not change spacing

Use supplied lockups; do not re-typeset.

Do not place on noise

Use a calm field with sufficient contrast.

One system. Every surface.

The package includes production vector artwork, transparent PNG exports, favicon and app icon sets, a navbar lockup, monochrome variants, a brand board, and this usage guide.

VECTOR

- Primary horizontal
- Inverse horizontal
- Stacked lockups
- Symbol and navbar
- Monochrome artwork

DIGITAL

- PNG @ 1x / 2x / 4x
- Favicon SVG / ICO
- Touch icon 180
- PWA icons 192 / 512
- Social avatar 1200

GUIDANCE

- Color tokens
- Typography direction
- Clear space
- Minimum sizes
- Usage restrictions
